

Akademie für Integrative Medizin, Zahnmedizin und Bewusstseinsstechniken

Regional variation in root dentinal tubule infection by *Streptococcus gordonii*. Love (1996). *J. Endodon.* 22:290-293.

A scanning electron microscopic evaluation of in vitro dentinal tubules penetration by selected anaerobic bacteria. Siqueira et al., (1996). *J. Endod.* 22:308-310.

Effect of dentin treatment on in vitro root tubule bacterial invasion. Perez et al., (1996). *Oral Surg. Oral Med. Oral Pathol. Radiol. Endod.* 82:446-451.

Observation of bacteria and fungi in infected root canals and dentinal tubules by SEM. Sen et al., (1995). *Endod. Dent. Traumatol.* 11:6-9.

Bacterial invasion into dentinal tubules of human vital and nonvital teeth. Nagaoka et al., (1995). *J. Endod.* 21:70-73.

The fate and the role of bacteria left in root dentinal tubules. Peters et al., (1995). *Int. Endod.* 28:95-99.

Dentine tubule infection and endodontic therapy implications. Oguntebi (1994). *Int. Endodo. J.* 27:218-222.

Endodontic pathogens: propagation of infection through patent dentinal tubules in traumatized monkey teeth. Ehnevid et. al., (1995). *Endod. Dent. Traumatol.* 11:229-234.

Bacterial retention in canal walls in vitro: effect of smear layer. Drake et al., (1994). *J. Endod.* 20:78-82.

In vitro study of the penetration of three bacterial strains into root dentine. Perez et al., (1993). *Oral Surg. Oral Med. Oral Pathol.* 76:97-103.

A study of the distribution of endotoxin in the dentinal wall of infected root canals. Horiba et al., (1990). *J. Endodon.* 16:331-334.

Predominant obligate anaerobes invading the deep layers of root canal dentin. Ando and Hishino (1990). *Int. Endod. J.* 23:20-27.

Scanning electron microscope study on the action of endodontic irrigants on bacteria invading the dentinal tubules. Gutierrez et al., (1990). *Oral Surg. Oral Med. Oral Pathol.* 69:491-501.

Intraradicular bacteria and fungi in root-filled, asymptomatic human teeth with therapy-resistant periapical lesions: a long-term light and electron microscope follow-up study. Nair et al., (1990). *J. Endod.* 16:580-588.

In vitro study of bacterial invasion in radicular dentin. Arai et al., (1989). *Nippon Shishubyo Gakkai Kaishi* 31:147-155.

In vitro infection and disinfection of dentinal tubules. Haapasalo and Orstavik (1987). *J.*

**Akademie für Integrative Medizin,
Zahnmedizin und Bewusstseinsstechniken**

Dent. Res. 66:1375-1379.

Experimental studies on bacterial invasion into radicular dentinal tubules of infected root canals. Ninomiya et al., (1983). Hiroshima Daigaku Shigaku Zasshi :172-177.

Bacterial invasion of pulpal dentin wall in vitro. Akpata and Blechman (1982). J. Dent. Res. 61:435-438.

Bacterial penetration of human dentin in vitro. Michelich et al., (1980). J. Dent. Res. 59:1398-1403.
